Amarakosha

The chief lexicon, most highly valued by all is Amara Simha's (5th C.) Namalinganusasana. This work is well known as Amara Kosha. It has been commented upon by many excellent scholars, such as Kshira Swamin(9th C.), Raya Mukuta(1431 A.D),Linga Bhatta(12th C.), Bhanuji Dikshita(9th C.) etc. Among them Kshiraswamin's commentary stands first, on account of its richness of quotations from various authors.

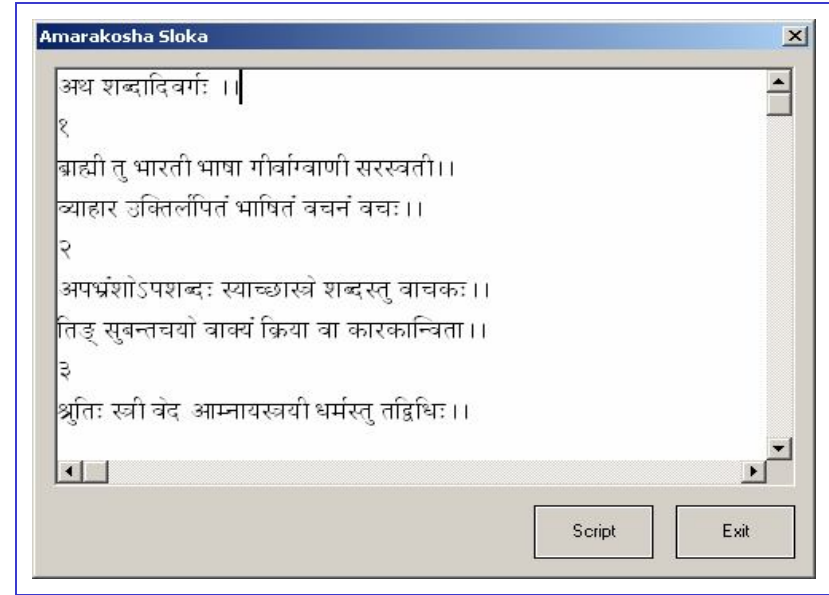

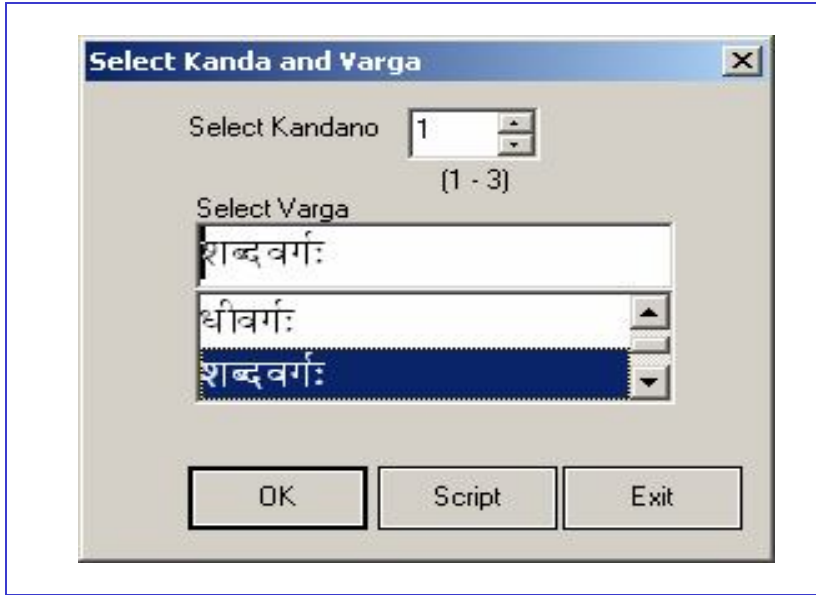

Having three kandas, this lexicon is further divided in many vargas. This typical lexicon follows the metric/sloka style. This book is one of the few important primers for any Sanskrit student.
